

2/8/69

Dear Lou,

Based on the accounts of the opening statement in the papers, these few suggestions:

Buell Frazier- if you do not intend to prove Oswald carried the rifle, Black Star has pictures of his 1026 Beckley room showing diaphenous curtains being put up the next day. Photog named Danish, I believe. I have contacts. If you do, perhaps the defense will know of the pictures.

WDSU film- Jim believes the man he believes is Shaw ducked in the Campt St. side door. In those days that door opened only from the inside.

Zapruder camera- I presume you will get it. If you do not, I have a duplicate. The speed of the camera can be made to vary at any rate between 18-48, which is to say neither that it did or did not that day-never proved.

Rifle- if you do not get it and feel you must, I have a duplicate that Steve Burton has not returned in a year. I asked him to send it to you in case you needed it at least a month ago. I have the exact sight, brand new, I've thus never been able to mount. Perhaps you do not need, but you do know if you do.

Should you develop any interest in Frederick Sullivan, I have carried this just a little forward. Robert Oswald's testimony on it is not as I recall's testifying and is specific on Ferrie and Oswald in CAP. I wonder if this may not have been the reason for virtually kidnapping Philip - to see if he knew or recalled or had heard.

If you have any copies of the opening statement, I'd like one.

If you have not paid the travel agency for the ticket, please let me know for then I will have to.

Good luck

Harold Weisberg
